GOAL HEATMAP

03.08.2025 - 16.05.2026

GOAL HEATMAP

Low High

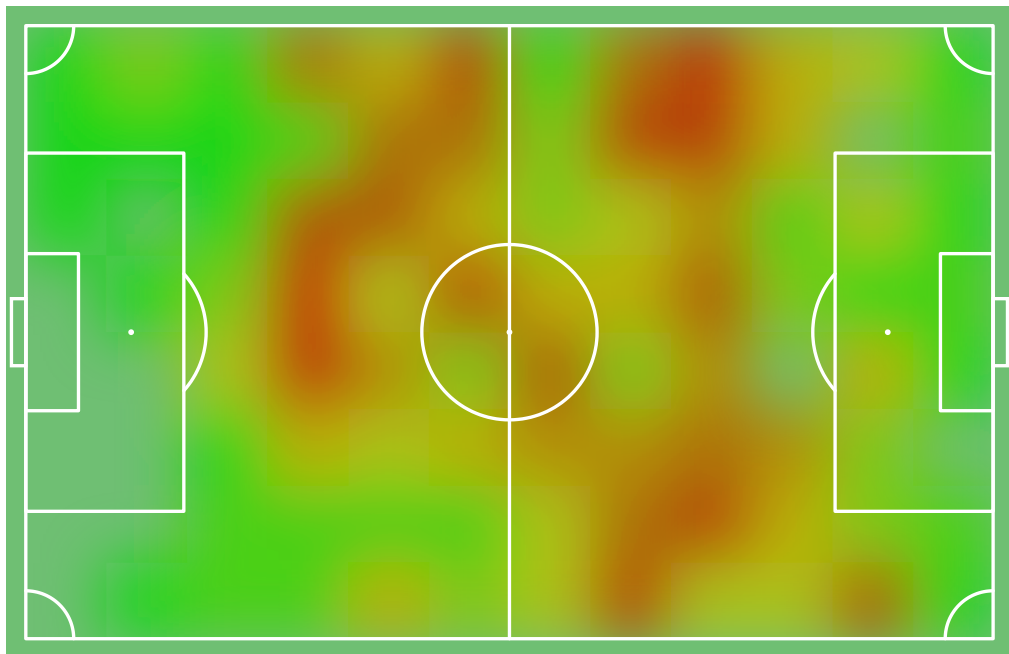

Color intensity shows where goals were scored in the goal mouth. Red zones are the most targeted areas.

SHOTS AT GOAL

goal shot
8 (27%) goal, 22 shot

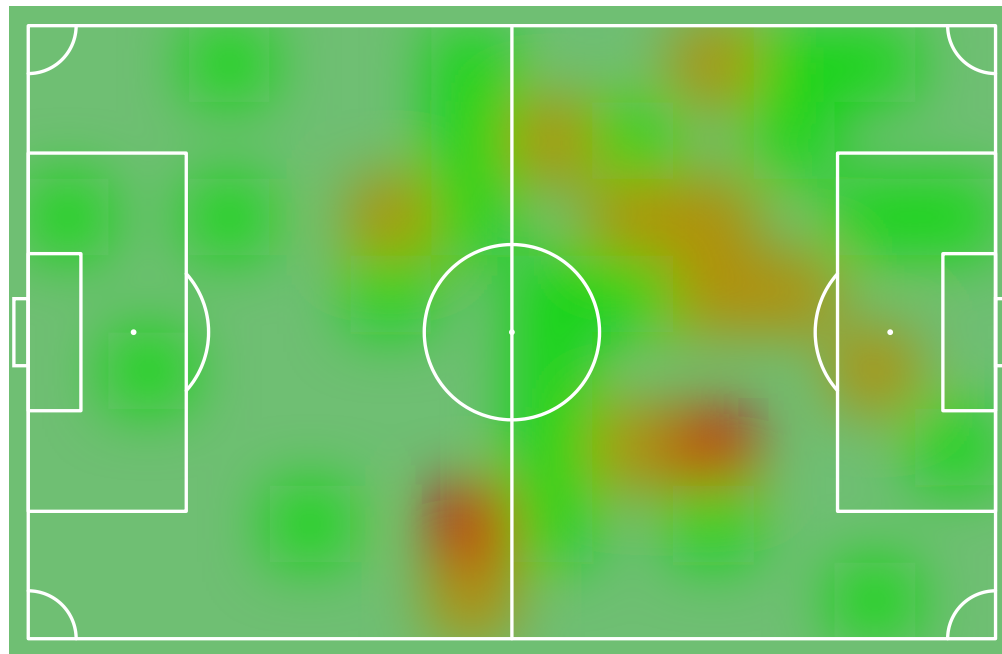

PASSES HEATMAP

Low  High

Color intensity shows where passes were played on the pitch. Red zones had the highest pass density. Zone cards show count and share of total passes.

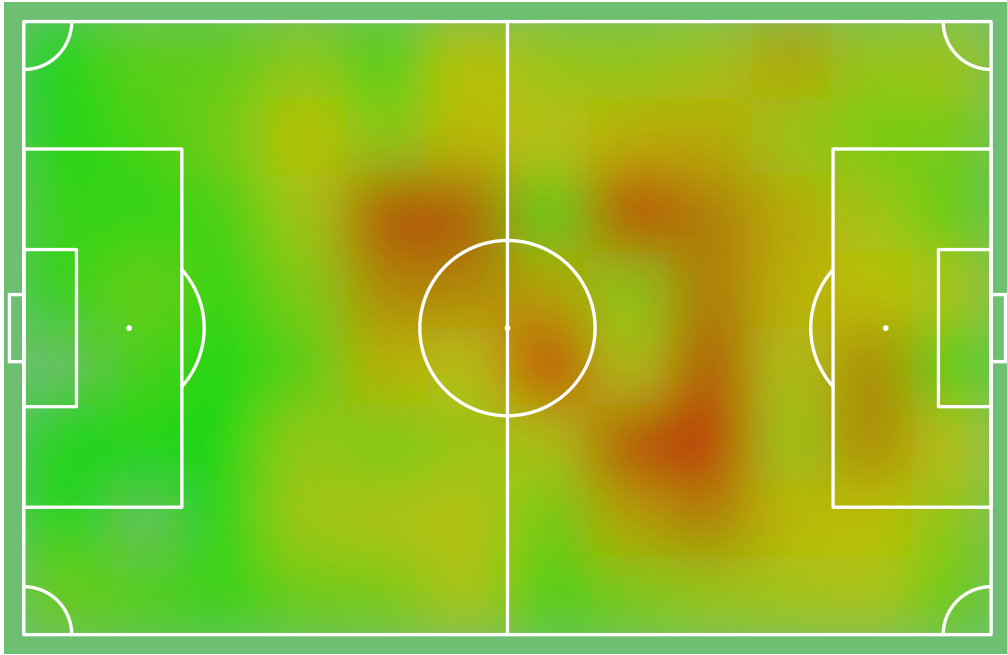

DUELS HEATMAP

Low  High

Color intensity shows where duels occurred on the pitch. Red zones had the highest concentration of duels.

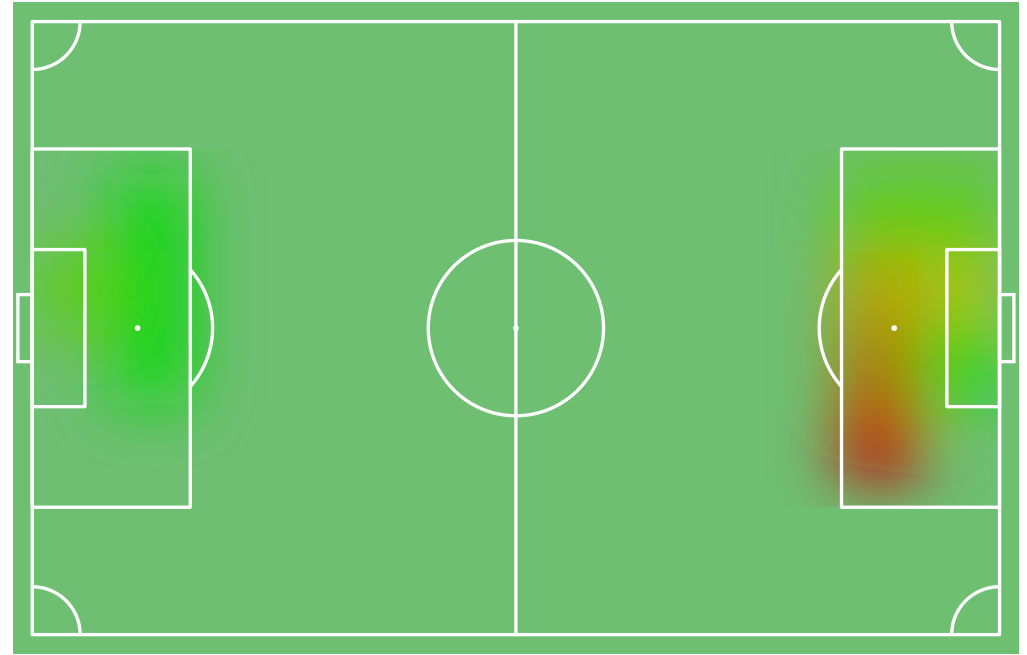

ON BALL EVENTS

Low  High

Color intensity shows where on-ball actions occurred on the pitch. Red zones had the highest activity.

GOALS / SHOTS

Low  High

Color intensity shows where goals and shots occurred on the pitch. Red zones had the most shooting activity.

GLOSSARY

Glossary

Definitions of the key metrics and concepts used throughout this report.

GENERAL	
Per 90	Stat value normalized to 90 minutes of play, allowing fair comparison between players with different amounts of playing time.
Percentile	Shows where a player ranks relative to their peer group. A 90th percentile means the player outperforms 90% of comparable players in that metric.
Rank	The player's absolute position within the peer group for a given metric (e.g. 5th out of 120 players).
Peer Group	The pool of players in the same position across the selected competitions and seasons used as a benchmark for ranking and percentiles.
Index	SmrtIndex — our proprietary performance score, currently in beta. It combines multiple weighted metrics across attacking, defensive, and technical actions to produce a single number that reflects a player's overall contribution. Methodology and weights are continuously refined as we gather more data.
Analytic Snapshot	An AI-generated written summary of the player's key strengths, weaknesses, and performance trends based on the data in this report.

PASSING	
Forward Passes	Passes played towards the opponent's goal, typically progressing the ball into more dangerous areas.
Backwards / Across Passes	Passes played sideways or backwards, typically used for ball retention, recycling, or switching play.

PITCH ZONES & HEATMAPS	
Own Third	The defensive third of the pitch — the 35 metres nearest to the player's own goal.
Central Third	The middle section of the pitch, roughly between the two penalty areas.
Final Third	The attacking third of the pitch — the 35 metres nearest to the opponent's goal.
Heatmap	A color-coded pitch visualization showing activity frequency by zone. Red/orange areas indicate the highest concentration of events; green areas indicate lower activity. All events are normalized so the player always attacks to the right.
Goal Gate	A visualization mapping shots and goals onto the goal frame, showing exactly where the ball was directed.

PLAYING TIME	
Minutes Played	Total minutes the player spent on the pitch across all selected matches.
Played (%)	Percentage of all available minutes (matches × 90) that the player actually participated in.
Missed	Minutes the player did not play — due to substitution, non-selection, suspension, or injury.

DUELS & ACTIONS	
Duels	Ground 1v1 challenges between two players contesting possession of the ball.
Aerial Duels	Challenges for the ball in the air, typically headed duels from crosses, long balls, or set pieces.
Dribbles	Attempts by the player to take on and beat an opponent while retaining possession of the ball.
Challenges (Attack)	Duels or physical contests the player won while the team was in an attacking phase.
Challenges (Defence)	Duels or physical contests the player won while the team was in a defensive phase.
On-Ball Events	All recorded actions where the player was in direct contact with the ball — including passes, dribbles, shots, crosses, and first touches.
Ball Recovery	Successful retrieval of a loose ball or an interception that regains possession for the player's team.
Lost Balls	Instances where the player lost possession, including misplaced passes, unsuccessful dribbles, and dispossessions.

CHART TYPES	
Radar Chart	A spider/web chart showing a player's performance across multiple attributes simultaneously, making it easy to spot strengths and weaknesses at a glance.
Donut Chart	A circular chart illustrating the proportion between two categories (e.g. won vs. lost duels). The ratio shown below each chart represents the primary segment count over the total.
Distribution Bar	A histogram showing how all players in the peer group are distributed for a given metric. The highlighted bar shows where this player falls within the distribution.

ATTACKING	
Goals	Number of goals scored by the player, excluding own goals.
Assists	Final passes or crosses that directly led to a goal scored by a teammate.
Chances Created	Passes, crosses, or set-pieces that created a clear goal-scoring opportunity for a teammate (also known as key passes).
Chances Scored	Ratio of clear goal-scoring opportunities the player received that were converted into goals.
Shots on Target	Shots aimed at goal that would have gone in without a save — excluding blocked shots that did not reach the goalkeeper.
Shots off Target	Shots that missed the target frame entirely or were blocked before reaching the goalkeeper.

RADAR METRICS (FIELD PLAYER)	
Scoring	Average percentile of goals per 90 and xG per 90.
Creativity	Average percentile of assists per 90, xA per 90, and key passes per 90.
Passing	Average percentile of accurate passes per 90 and progressive passes per 90.
Dribbling	Percentile of completed dribbles per 90.
Defending	Average percentile of defensive duels won per 90 and recoveries per 90.
Physical	Average percentile of aerial duels won per 90 and offensive duels won per 90.
